

Derrick Osebe

Software Engineer - Distributed Systems, IoT Telemetry & Applied AI

Email: derrickosebe70@gmail.com | GitHub: github.com/OsebeMoses | Nairobi, Kenya

EDUCATION

BSc in Computer Science - Kabarak University [Expected Dec 2026]

EXPERIENCE

Telematics Africa Limited - Software Engineering Intern [Industrial Attachment]

- Engineered IoT telemetry analytics and data ingestion workflows for fleet management.
- Executed database sanitization, index optimization, and schema cleansing in PostgreSQL.
- Analyzed edge sensor feeds to resolve transmission anomalies across vehicle units.

FEATURED PROJECTS

ColdTrace: Offline-First Vaccine Thermal Telemetry Platform [React, Node.js, IndexedDB]

- Zero-loss offline queue buffering with Arrhenius kinetic thermal degradation forecasting.

Wakili Mkononi: Constitutional RAG & Semantic Retrieval Pipeline [Python, Supabase, React]

- Sub-second legal citation retrieval with strict prompt guardrails against hallucination.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, Node.js, SQL, C/C++

Databases & Cloud: PostgreSQL, Supabase, MySQL, IndexedDB, Redis

Specializations: Distributed Systems, Telemetry Buffering, Vector DBs, RAG Ingestion
